Test Suite Overview

Field	Details
Test Suite Name	Browser Context Page (BCP) Launch Verification
Application URL	https://app.vwo.com
Objective	Verify browser launch, context creation, page navigation, and proper cleanup
Browser	Chromium
Script Type	Playwright Script (non-test-runner)

Test Cases

TC ID	Test Scenario	Test Steps	Expected Result	Browser	Status
TC-001	Verify Browser Launch, Context, Page and Navigation	1 Launch Chromium browser with <code>chromium.launch({headless: false})</code> 2 Create a new browser context via <code>browser.newContext()</code> 3 Open a new page/tab via <code>context.newPage()</code> 4 Navigate to <code>https://app.vwo.com</code> 5 Capture page title 6 Close page, context, and browser (reverse order cleanup)	- Browser launches successfully with Chromium - Context creates an isolated session - Page navigates to VWO login page - Title displays "Login - Wingify" - Cleanup completes without errors	Chromium	✓ PASSED

Execution Summary

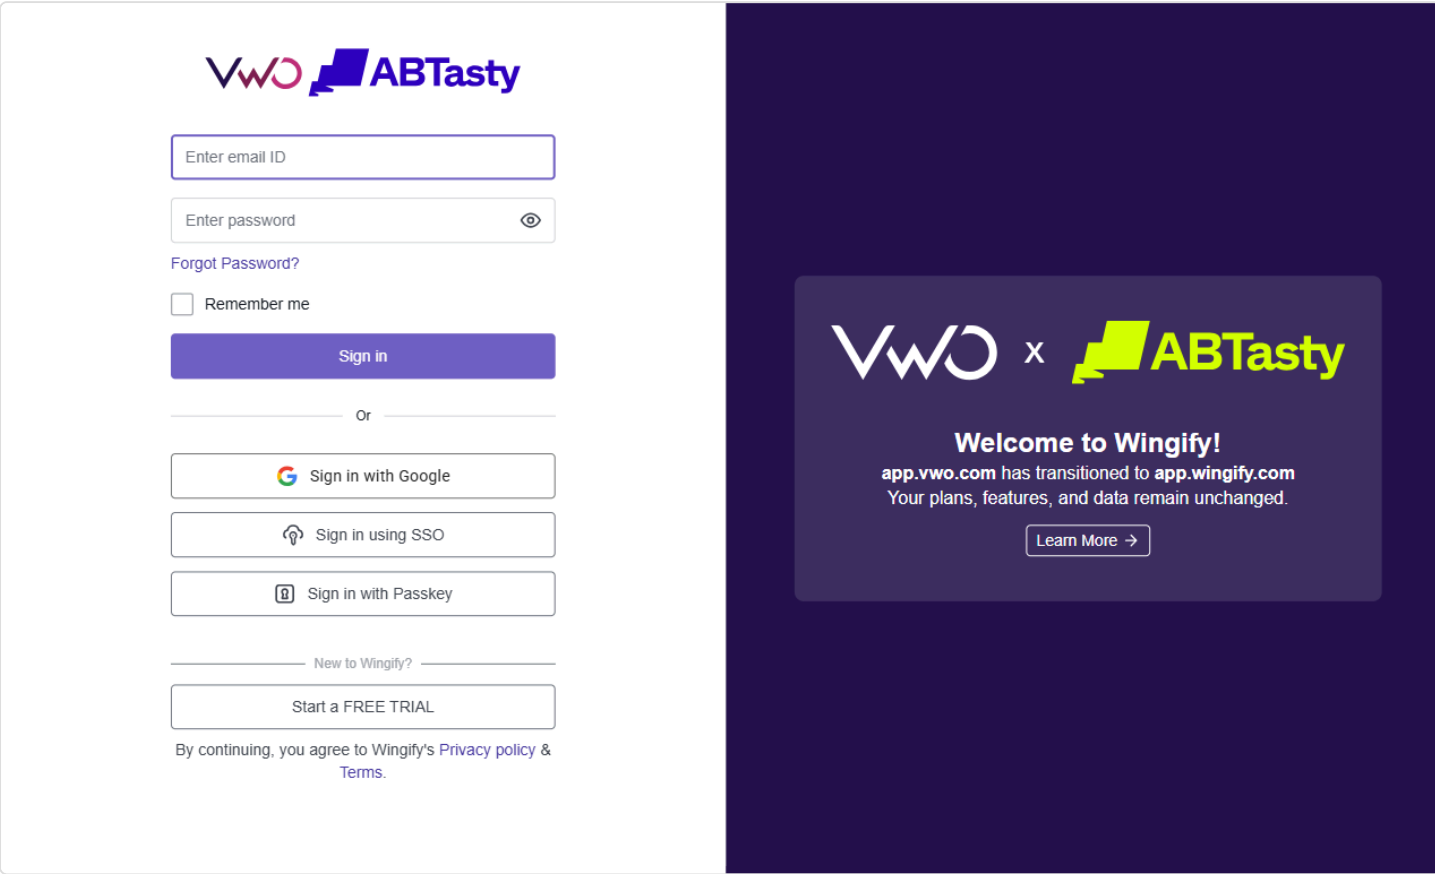

Metric	Value
Total Test Cases	1
Passed	1
Failed	0
Browser	Chromium
Artifacts	Screenshot

Console Output

```
Browser Launched
Context Created
Page opened
Title: Login - Wingify
Browser closed successfully
```

Screenshots

Step 4: Navigate to VWO Login Page

Source Code

```
import {chromium, Browser, BrowserContext, Page} from "playwright";
import path from "path";

async function run() {

  let browser : Browser = await chromium.launch({headless: false});
  console.log("Browser Launched", browser);

  let context1: BrowserContext = await browser.newContext();
  console.log("Context Created", context1);

  let page: Page = await context1.newPage();
  console.log("Page opened");

  await page.goto("https://app.vwo.com");
  await page.screenshot({ path: "screenshots/BCP/01-navigate-to-vwo.png", fullPage: true });
  console.log("Title:", await page.title());

  await page.close();
  await context1.close();
  await browser.close();

  console.log("Browser closed successfully");
}

run();
```
